

MariaDB

ADDING A ROOT USER PASSWORD

You need to login to MariaDB and type the following command to add a password to the root user: please take note of the **apostrophes** enclosing the password and username.

```
UPDATE mysql.user SET Password=PASSWORD('password') WHERE User='root';
```

Flush privileges to reload the grant tables.

```
flush privileges;
```

IMPORTANT NOTICE

Copying and then pasting commands from a pdf can produce errors when pasting the commands into your terminal emulator.

Confirm the accuracy & correctness of the command before pressing enter.
